**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1616

Claims 1-14 are pending in this application.

Claims 7-12 stand withdrawn from further consideration as being directed to non-elected subject matter. Claims 1-6 and 13-14 will presently be examined.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 and 4-5 stand rejected under 35 U.S.C. 102(b) as being anticipated\_ . . . . .

by Relyveld et al. for the reasons of record.

Applicant's arguments, filed in Paper No. 9 (6/26/03), have been given due consideration but they were deemed unpersuasive. Applicant argues that Relyveld et al. fail to disclose "method for denaturing allergens." Applicant argues that Relyveld et al. only disclose diminution in the reaction of the skin due to allergens being adsorbed to the gel that contains calcium phosphate. The Examiner cannot agree with applicant's position.

Nowhere in the specification is there a specialized definition of "denaturing allergens." Denaturing is ordinarily understood to mean unfolding of double-helical DNA or native conformation of proteins. There is no established definition for denaturing allergens – note, allergens such as pollens are not pure proteins or DNA, but rather, inclusive of other types of substances, e.g. pollens are male gametes of plants. Hence, denaturing allergens (such as pollens) could mean disrupting the conformation or structure of allergens or it could also mean deactivating allergens. The Examiner

Art Unit: 1616

maintains that the latter definition, deactivating allergens, applies to Relyveld's teachings.

This ground of rejection is therefore maintained.

Claims 3, 6 and 13-14 are objected to as being dependent upon a rejected base claim, but would be allowable, *pending a search update at the time of the next Office Action*, if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
